Preface

Pocket Year Book Australia is a companion publication to *Year Book Australia* (1301.0). It provides a broad statistical picture of Australia's economic and social environment in a convenient pocket size.

Tables for this *Pocket Year Book* have been selected from *Year Book Australia 1995*. However, due to size and space constraints, time series data have been reduced.

ABS publications draw extensively on information provided freely by individuals, businesses, governments and various organisations. Their continued cooperation is very much appreciated; without it the wide range of statistics published by the ABS would not be available for general use by the community. Information received by the ABS is treated in strict confidence as required by the Census and Statistics Act.

ABBREVIATIONS — *continued*

The following abbreviations have been used in the statistical tables:

°C.	degrees Celsius	ML	megalitres
\$m	dollars million	mm	millimetres
GL	gigalitres	mill.	million
f.o.b.	free on board	no.	number
ha	hectares	%	per cent
kg	kilogram	km ²	square kilometres
km	kilometres	TL	teralitres
kWh	kilo watt hours	t	tonnes

SYMBOLS AND ABBREVIATIONS

Yearly periods shown as, for example, 1993 refer to the year ended 31 December 1993. Those shown as, for example, 1992-93 refer to the year ended 30 June 1993.

Values are shown in Australian dollars (\$) or cents (c) unless another currency is specified.

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

SYMBOLS

The following symbols, where shown in columns of figures or elsewhere in tables, mean:

n.a.	not available
n.y.a.	not yet available
—	nil or rounded to zero
..	not applicable
p	preliminary — figures or series subject to revision

r	figures or series revised since previous issue
n.e.c.	not elsewhere classified
—	break in continuity of series (where drawn across a column between two consecutive figures)
*	subject to sampling variability too high for most practical purposes

ABBREVIATIONS

The following abbreviations are used for the titles of the Australian States and Territories and Australia:

NSW	New South Wales
Vic.	Victoria
Qld	Queensland
WA	Western Australia
SA	South Australia
Tas.	Tasmania
NT	Northern Territory
ACT	Australian Capital Territory

(a) SDRs, and Australia's reserve position in the IMF are based on the IMF basket valuation for the SDR, which is published in terms of US dollars crossed with the representative rate for the Australian dollar in terms of the US dollar. Gold is valued at the average London gold price for the month, converted to Australian dollars at the market rate of exchange applying on the last trading day of the month. The foreign currency value of all other overseas assets has been based, where applicable, on market quotations. Accrued interest is normally taken into account. Conversion to Australian dollar equivalent is based on end of period market rates of exchange. (b) These exchange rates are derived by averaging figures for each trading day.
